SAFETY STANDARDS REQUIRED OF THE MAIN CONTRACTOR FOR WORK SUBJECT TO LICENCES AND FOR THE WORK SITE

1. National standard
2. International standard
3. Work site-related standard
4. Official standard
5. Total number of personnel if licence or certificate is not required of all work performers

SuoTu® marks the licensees as authorised to issue the trainer association's licence if supervision is exclusively with the main contractor, except with regard to the Hot Work and Occupational Safety Cards.

In the **Supervision** column, the suppliers that compliance supervision applies to so that the training and other requirements in accordance with the statutes and regulations on their own work site are fulfilled are noted, as well as the fact that the **issuer** has the right and competence to issue them.

Supervision	Certificate, licence, performance card or pass	1	2	3	4	5	Issuer	Other

The list has been prepared by Oy Bonum-Safety Ab / SuoTu® and is freely available for the use of all.

www.suotu.fi

The list is generally given in connection with an invitation for tenders, returned at the same time as when the tender is submitted.

With this procedure, the occupational safety requirements and other obligations are taken into consideration that must be implemented at the work site.

These should be note at the start of work and frequently already upon arrival at the work site.
