Inspection, training or work performance requires always adequate qualification from the person performing the service.

If the provider does not have the qualification it is as same as there was no inspection or training performed at all.

Due to this, SuoTu®-cards or certifications can be given only by the trainer communities with the SuoTu®-license.

The Project manager, main contactors and customers can inform the qualifications required from the workers already when ordering the work performance.

These actors can also inform the trainings required before starting the work performance.
